Education & Outreach

WULFENITE, calcite, Silver Bell Mine, Pima County, Arizona, © Chris Whitney-Seifert.

MSA Purpose: To promote popular interest and education in Earth Science, and related fields (Geology, Mineralogy, Paleontology, and Lapidary arts). To foster a fellowship among individuals interested in Earth Science and enable our members to better identify materials we collect and how to display or further process these materials. To teach all generations about rocks, minerals, fossils and what can be done with them and be collaborative in community of groups with similar interests to our Society.
